

Albertans Win at Fair; Kings In Wheat and Oats Events

S. J. Allison of Red Deer, Alberta, was crowned Wheat King of the United States and Canada at the 48th International Livestock Exposition held recently in Chicago.

Allison's sample of Reward variety Hard Red Spring Wheat was selected by the judges as the most nearly perfect of hundreds entered in the hay and grain show held in conjunction with the International.

Allison's victory marked the 22nd time a Canadian has taken the Wheat Crown since the Grain Show became part of the International in 1919. Americans have won the title only four times.

John Elmk of Hairy Hill, Alberta, was crowned "Oats King". Thomas E. Brown of Cassils, Alberta, took fourth place in white

spring wheat and second in six-rowed barley. A.M. Johnson and Son of Beaver Lodge, Alberta, placed in bromegrass in the small seeds competition.

Canadians captured the first seven places in the Hard Red Wheat, 14 division. Including Allison's first. William Miller of Edmonton was 4th, and L.A. Pharris of Magrath, Alta., placed 7th.

Of the 24 placings in oats Canada captured 22 and Alberta came up with the first five. In addition to Elmk, the Oats King, John Boulton of Ales was second. Emmett G. Mohler of Camrose was third. Victor Watson of Aldrie was fourth and William Skidam of Andrew was fifth.

MAIL EARLY FOR CHRISTMAS

A.J. McLeod, local postmaster, has announced that there will be no mail delivery Christmas Day. He has also stated that if residents want parcels delivered in time to reach the receiver before Christmas they should be mailed as follows: United States—before Dec. 9. Maritime Provinces—before Dec. 14.

Ontario, Quebec and Manitoba—before Dec. 15. British Columbia—before Dec. 16. Alberta and Saskatchewan—before Dec. 17.

Local Delivery—before Dec. 18. Letters for local delivery should be posted with a 3-cent stamp, and for rural routes and Canada and United States points they should be posted with a 4-cent stamp for the first ounce.

BRITISH PARCELS LIMITED TO 20 POUNDS IN WEIGHT

There are only a few restrictions on the entry of Canadian gift parcels into the United Kingdom. They must contain only bona fide unsolicited gifts and must be marked as gifts. The contents are subject to customs and of purchase tax. For the present gift food parcels are admitted without customs charge, provided they contain footstools only and no other goods.

Canadian postal regulations limit the gross weight to 20 pounds (not 20 ounces), which limits are forwarded by parcel post.

Mrs. Sophie Martin Dies at Home on Thursday, Nov. 18

Mrs. Sophie Martin, 71, of Carbon, died at her home Thursday, November 18 at 10 p.m. Her sudden death was a shock to family members as well as to the community. Born on December 29, 1876, in South Russia, she was married to Christof Martin of the same district in 1901. In the same year the young couple immigrated to the U.S.A., making their home near Turtle Lake, N.D. In 1923 the family moved to Canada and settled on a farm near Carbon. In 1948 Mr. and Mrs. Martin retired from active farming and moved to the Village of Carbon.

Besides her husband, she is survived by four sons, Otto and Rudolph of Carbon, Reinhold of Calgary and Gustav of Redlands; six daughters, Mrs. Elizabeth Martin, Mrs. Lydia Simmonds, Mrs. Pauline Mortimer, all of Carbon, Mrs. Alvina Bryngelson of California, Mrs. Freda Long of Calgary, and Mrs. Wilma Gross of Roschard; 22 grand-children and two great-grand-children.

Funeral services were conducted from the Baptist Church, Carbon, Tuesday, November 23 at 2 p.m. Rev. E.M. Wagner, assisted by Rev. H. Schatz of Calgary, performed the funeral services. Pallbearers were O. Martin, G. Martin, E. Martin, R. Martin, J. Gross and A. Simmonds. Interment was made in the Presbyterian cemetery, Carbon, with Winter and Lefebvre of Drumheller in charge of arrangements.

District Grain Clubs Do Well at Fair

In the junior grain club competition at the Toronto Fall Fair 21 winners came from Alberta, and 13 of these were entries from the district under the supervision of district agriculturist N.P. Bell. Following is a complete list of the Alberta winners in the Junior Grain Club competition and their standings in the competition: 1. Leslie Mason, Warner; 2. Ian Borwick, Orkney Club, Drumheller; 3. William Weisbacher, Schuler; 4. Don Huether, Level Land Club, Carbon; 5. Bernard Henricks, Rockford; 6. John Rock, Orkney Club; 7. Hester Sharpe, Drumheller; 8. Howard Boppel, Rockford; 9. Lois Olsen, Drumheller; 10. Marjorie Leiske, Level Land Club, Rockford; 11. John Haas, Schuler Club; 12. Allen Stern, Level Land Club, Granger; 13. T.D. Carlson, Conquerelle; 14. Ross Cole, Orkney Club, Drumheller; 15. Lloyd Halstead, Carbon Club; 16. Mervin Heinzel, Rockford Club; 17. Franklin Jensen, Trochu Club; 18. Don Buyer, Carbon Club; 19. Pat Hagel, Beiseker Club; 20. R. E. Haas, Schuler Club; 21. Wilfred Boese, Swallow Club.

Amateur Show Well Received By Good Crowd

A highly successful and entertaining amateur program, sponsored by the Students' Union, was staged in the Scout Hall, Carbon on Wednesday, November 24, and a good crowd was on hand to encourage the local talent to greater efforts in giving a pleasing performance.

The program began with the singing of O Canada, and was followed by a speech given by Mr. Hugh Isaac. Children's numbers opened the amateur selections with a song, "Home on the Range," by Dale Hector. Don Warren, Wayne Ohlhauser, Wayne Garret and Bonnie Fox, Avila Simpson rendered a pleasing solo, "Winter Wonderland." A song, "School Days," by Margaret Warren and Maxine Campbell brought forth the plaudits of the crowd. Joanne Ohlhauser gave her rendition of "Home Sweet Home" on the piano, and this was followed by a song, "Four Leaf Clover," by Gail Schmeier and Diane Bushby. Vincent Adams then performed a dance, "Drum Majors on Parade." Wayne Ohlhauser and Bonnie Fox followed with a song, "Old McDonald Had a Farm." The junior entries followed with a song, "Old MacDonald Had a Farm," by Wesley Warren, a solo, "A Hey and a Ho" and a solo, "In the Ho," by Wayne Garrett, and a solo by Jean Lang.

Senior entries were next on the program, commencing with a Shadow play which could have been called "Operation Successful," or "The Case of the Missing Pupils." Starting in this was Ray Wright as the doctor, Merle Ohlhauser as the patient and Mary Flaws as the nurse. Don McLeod followed this with a rendition of "Old Man River." Margaret Schmeier delighted the audience with a piano solo, "Life in the Finland Woods," and Marjorie Leiske gave a monologue, "The Part Touch." Earland Ziegler gave a creditable performance on the saxophone and a comic number by local "Doodads" followed. An eloquent number was ably presented by Kenneth Kirby, and a solo, "In a Window in a House in Caroline," was rendered by Phyllis Schuler. Another eloquent number was next with Hazel Code pleasing the audience with "Two Changed my Mind."

In accordance, solo given by David Jensen, followed. The final performance of the program was a play, "Advice to the Lovelorn," with a cast of eight. Editor Jones was played by Gordon McLeod, the office boy was played by Johnny Harnwell, Lorraine Milligan took the part of Melissa Moore, Yvonne Foster that of Gerlie Teen, Lloyd Halstead acted the part of Mr. Turndove, his wife was played by Margaret Schmeier, Kay Hayswood was Howard Hunt and Mrs. Grotow was presented by Helen Schmidt.

Junior winners were Jean Lang for vocal solo, Wayne Ohlhauser and Bonnie Fox for group singing, and Joanne Ohlhauser for her piano rendition in the instrumental group.

In the senior events, a tie resulted in the vocal and elocution numbers. Marjorie Leiske and Hazel Code tied for elocution and Don McLeod and Phyllis Schuler drew in the vocal selection. The comic prize was won by the cast of the Shadow play, and the instrumental prize went to David Jensen for his rendition on the accordion.

God Save the King brought the program to a close.

MART KENNEY

Mart Kenney's Western Gentleman and their sweet and low music is being heard again on the Canadian Cavalcade series which began in September. During the summer they toured the east from Toronto to Halifax.

Masons Entertain Wives at Social

On Tuesday, November 23, the members of Carbon Masonic Lodge entertained their wives at a social evening and about 60 people were present on the occasion.

The evening was spent in playing court whist and prizes were given on the night's play. Winners were: Mrs. McKeller and Mr. Ray Campbell; Mrs. J. Hughes and Mr. McKeller; consolation, Mrs. B. Shaw and Mr. Leo Halstead.

The highest score for a pair was made by Mrs. E. Holmes and Mr. Bert McCracken. Highest individual score went to Mrs. Leo Brown for ladies and Dan Rustler for men. High and low lady were Mrs. S.N. Wright and Mrs. McKeller. High and low man were Mrs. B. Shaw and Mr. F. Foxon. Mrs. D. Rustler and Mr. F. Emery were high honors winners.

Mr. W.A. Braisher proposed the toast to the ladies and Mrs. Len Foxon responded. The evening came to a close with community singing and lunch.

BABY PRICE TO RECEIVE UNITED KINGDOM RATION BOOK

The Duke of Edinburgh has registered the birth of his son with the Assistant Registrar of Westminster, London. The baby received a ration book and identity card, just the same as any other baby born in Britain.

OUR COMPLETE SHORT STORY—

COULD YOU REEMEMBER?

By Matthew F. Christopher

She Had Never Been
Concerned About Him
In School, Or Had She?

HE WAS famous now, and he would not remember. If he did remember, he would pretend he didn't. He wasn't only Freddie Hampton of grade-school days, who used to sit behind her in classroom and run his fingers through her hair, and kid her about her upturned nose, and the empty spot in her mouth which a tooth was missing, which you could see every time she laughed or smiled. He wasn't only that Fred die Hampton. He was the Freddie Hampton, in caps; the famous radio actor who had roles on three different shows.

It was like a fantastic dream, Cathy thought. She cherished the memory of those wonderful days. Perhaps it hadn't been so wonderful then, because she could remember quite vividly, that Freddie's taunts had gotten on her nerves. And she had called him that many times. She used to get so mad at him, sitting before the radio, laughing quietly to herself. Yes, it was funny to look back, like gazing through Grandma's and Grandpa's family album. Why should Freddie Hampton do this to her? He was never concerned about him in school, or had she?

He was in town now, visiting his uncle. The senior class girls had really made a hub of about him.

"Boy, is he cute!" Geraldine Arnold had commented, with eyes that rolled around big and round and so well, beautiful. Geraldine had finished with a whistle.

Mary Carmel had suddenly become all a-dither. Mary had only lived here two years, and she had not known Freddie personally, but she had heard him many times on his radio program. "Gee!" she had cried happily. "Did he speak to you, Geraldine?"

"Why, of course!" He used to sit right across from me in school, didn't he? As if Mary should have known.

He sat across from you, all right, Cathy thought, but it was the one who had sat directly in front of him. Whose hair he used to pull, and whose nose he used to make fun of. He never passed you, Geraldine!

She could have said so much then, with all the girls staring at her, but she hadn't. She had hardly said a word, she didn't think she had even smiled.

She gazed across at the Saturday afternoon sunshine that creaked in a thin, golden veil around the curtains into the room, as if it eavesdropped on her thoughts. From the kitchen came the soft sound of her mother's baking the angel food cake for Sunday's dinner. Suddenly, she was consoled with the intense loneliness, and her nerves settled for a change of scenery. Not even the music from the radio—which generally helped to cure the blues—seemed to possess that certain reality, that something warm that almost invariably worked when she felt as she did today. She wanted to go out.

"Mother!" she said softly, but loud enough for her mother to hear. "I'm going out awhile."

"All right, dear!" her mother answered.

Cathy left the radio playing. She

picked up her black purse from the telephone stand, took out her gold-plated compact, and walked in front of the mirror. She touched her face lightly with the powder puff, examined her lips. She lifted her large, blue eyes in satisfaction. She put a long, slender finger through a curl and pushed it back slightly upon her head. Finally, she glanced at her nose. Darned, unlearned thing, she thought.

She reached Lovers' Boulevard and for a few minutes stood under the shade of a cherry tree and looked out upon the vast, green lawn that arched down toward the blue, beautiful lake. There were small, green benches on the lawn, with silver on most of them. There was a tree among all the rest—

It was a short tree. A maple. She looked at it, now, at the bench beneath it. There was someone sitting there. She knew the type. She used to sit there with Freddie Hampton. He'd have both arms draped over the top of the bench, and his leg crossed over the other. And they'd look at the sailboats on the lake, feeling the soft, fresh breeze caressing their cheeks, a blowing through her hair—the same breeze that ballooned the white sails and sent the tiny boats whipping over the blue water.

They would talk and talk, senseless things she could not even remember now, if she tried. Lots of it, though, she did remember, were about boats. Because Freddie liked boats. All kinds of boats. Sailboats, motor boats, canoes, yachts. He probably had earned enough by now, she thought, to own one of each kind.

She wanted to cross the boulevard to the other side. Took a step, changed her mind. Why continue being silly like this? she asked herself seriously. Why not go home, forget there ever was a Freddie Hampton, or is a Freddie Hampton?

There were no cars crossing the boulevard quickly. She stepped upon the curb, then the lawn, feeling it yield like a carpet under her feet. She felt the cool, brisk air against her cheeks, ruffling her hair a little. She tilted her head slightly, to get the benefit of the coolness on her wrist. She was looking down at the lake. He looked kind of handsome, she thought, stopping and lying down on the short-cropped grass, but she kept on walking.

Suddenly, she realized she wasn't far from the maple tree. The bench was beside it, with the man sitting on it. It was an unpleasant sight, a pattern across his black hair and not-to-wide shoulders. He was looking upon the lake. He looked kind of handsome. Cathy gazed at the back of his neck.

And then she saw that the man had his arms draped over the top of the bench, and that one leg was crossed over the other.

"Freddie!" she whispered, and her throat dried instantly.

He must have heard, because he turned around in a moment, but suddenly the coat that held her melted away and she broke toward him. Tears burned her eyes. But, oh, so happy tears!

"Cathy!" he exclaimed softly, and he stood up.

She seemed to be frozen to the leen for a moment, but suddenly the coat that held her melted away and she broke toward him. Tears burned her eyes. But, oh, so happy tears!

He must have heard, because he turned around in a moment, but suddenly the coat that held her melted away and she broke toward him. Tears burned her eyes. But, oh, so happy tears!

HER ROYAL HIGHNESS THE
PRINCESS ELIZABETH HAS HAD SOME
SLEEP DURING THE NIGHT.
HER CONDITION AND THAT OF THE
INFANT PRINCE IS SATISFACTORY.
SIGNED
WILLIAM AS FREDERICK
TODAY HAS BEEN

EVEN THE ROYAL "DOC" WAS UNDER A SPELL.—There was only one topic of conversation in England—throughout the British Empire for that matter—and that was the birth of a Prince to Princess Elizabeth and the Duke of Edinburgh. Every scrap of information about the royal blessed event made headlines. Most concrete scrap of the day was the official bulletin issued by the royal obstetrician, W. Gilliat, and posted outside Buckingham Palace. The good "doc" seems to have been as excited as any other Briton for his spelling is a little off the beam. Note the word "satisfactory" in the bulletin.—S.N.S. photo.

Manitoba Still To Retain One Licence Plate

Two Canadian provinces — Manitoba and Quebec will retain the war-time single licence plate for automobiles during 1949. British Columbia motor vehicles will sport deep yellow licence plates with black lettering after March 1 next year. The colors are just a little different from any chosen in North America.

Manitoba's plates will be nearest, with black on ordinary yellow, and will share the colors with six states of the U.S.

Saskatchewan will issue two plates with coloring of deep maroon background and white letters.

Texas has gone everyone just a bit better. The cars will be tagged with gold plates bearing black letters.

THAT FOR SURE

YORKTOWN, Mass.—A case in court here centered around the ownership of a calf.

"Whose heifer was it?" the defence lawyer asked.

"The cow's," replied the witness.

SAFEGUARD DEER

NANAIMO, B.C.—Two fawns found in the woods are to spend the rest of their lives at a cougar-dog training school near here.

They were caught by a hunter, but were taught to ignore them, thus when seeking cover they will ignore deer.

Production On The Increase In Southern Alberta By Irrigation

(BY FORBES RHODE, CP)

LETHBRIDGE, Alta.—Sugar and alfalfa are contrasting products of Lethbridge, fast-growing city of the south of Alberta, and if you don't think they have much in common, read on. For that juicy steak you'll eat some time next year, right now is on the hoof in the Lethbridge feed yards, munching away on the pulp of sugar beets, after the sugar has been extracted.

It is an example of the rounded-out economy which is abounding. Not so long ago, in the '80s, Lethbridge was founded on coal—and it still is around here in abundance.

Also came cattle, because the buffalo had gone and the Indians had to be fed. Then hard wheat, still the wealthiest crop. But relatively recently came irrigation on a large scale, and that is the word in Lethbridge today.

For irrigation made possible the sugar beet and one out of every 10 pounds of sugar which Canadians eat is produced right here; it brought vegetables and a canning industry, and last year 1,500 extra pounds of frozen peas were shipped to Ontario alone. It provided extra fodder for cattle, and it removed much of the curse of drought from a country which at best has a low rainfall.

It is also bringing more population per square mile—raising it gradually from three persons to 17, a stable population which should get along boom or depression, dry year or wet.

There's oil around here too, not a great deal in production yet, but sharing Alberta's general optimism in this direction.

Irrigation

Take this matter of irrigation and forget for the moment the big what-ifs of this area which produced 42,000,000 bushels of wheat worth \$75,000,000 this year, and the large ranches as big as 45,000 acres.

For irrigation makes possible the smaller farms, say, 100 acres. They plant about 25 acres to sugar beets from which a farmer today can get \$200 an acre; some farmers to vegetables for canning which will bring \$125 to \$150 an acre; the rest to hay, cattle, some wheat, then mostly for feed; and they eat cattle and sheep.

About 526,000 acres now are irrigated in southern Alberta, but further big ones are afoot. There's the St. Mary-Milk river development, for instance, south of Lethbridge, which will have a dam creating a lake 17 miles long by six wide, and adding 400,000 acres. It will make possible 2,000 to 4,000 farms, where now there are only 500. Altogether about 2,500,000 acres in southern Alberta may be brought in, and this is part of a larger western picture which envisages similar developments in central and southern Saskatchewan.

It is fascinating to visit the sugar beets, alfalfa, and cattle in the St. Mary-Milk river development, for instance, south of Lethbridge, which will have a dam creating a lake 17 miles long by six wide, and adding 400,000 acres. It will make possible 2,000 to 4,000 farms, where now there are only 500. Canada's Tourist Trade To Increase Through Movies

VANCOUVER.—Canada is due for increased tourist publicity through Hollywood movies.

H. B. Baker, manager of Vancouver Tourist Association, told a meeting of the tourist group in Terminal City Club that the Federal Government is already in negotiation with the film industry toward this end.

The movie industry had agreed to give Canada increased presentation in news reels shown in the United States. At least one Canadian news story is to be contained in each week's American release.

Cumbers originally came from southern Alta. and have been grown for more than 4,000 years. 2800

FEATHERED HEADDRESS AT POULTRY SHOW INTRIGUES MODELS—One of 6,825 entries that were in the poultry show at the Royal Winter Fair at Toronto is this created Polish chicken with its elegant head feathers. Two interested visitors are Jui McFarland and Nan Lunney, models from the fair fashion show. The poultry show is only one of the many events in which agriculturists from all over Canada exhibit their prize livestock and farm produce.—S.N.S. photo.

A KING-SIZED INCUBATOR as shown above was at hand as a precautionary measure during the birth of Princess Elizabeth's baby.—S.N.S. photo.

JAP WAR CRIMINALS HANG—An eleven-power court in Tokyo doomed Japanese war criminals to hang. Hideki Tojo, premier of Japan, and six of his leaders died and 16 others were given life imprisonment. Fifteen war criminals were hanged on gallows like this in Germany during the past month. In Tokyo, similar gallows carried out the sentences.—S.N.S. photo.

ROYAL BABY'S FATHER—A son, who one day may rule the Commonwealth, has been born to Princess Elizabeth. The royal baby, who has been described as a "bunny lad", weighed seven pounds, six ounces at birth. At 13 months, this is the royal baby's father, the Duke of Edinburgh, who saw his son, the baby prince, after he was allowed a brief visit with the princess.—S.N.S. photo.

WINS TRIP—Pretty Pat Taylor of Vancouver, B.C., is on her way to the bright lights of New York. She won a "Daisy Mae" contest and the prize was an all-expense paid journey to the big city.—S.N.S. photo.

NEW GRANDPARENTS are King George and Queen Elizabeth, seen chatting with Viscount Alexander, governor-general of Canada, when he was in London for the unveiling of the memorial to Franklin Roosevelt. "It's a fine, spanking boy," said the King after seeing his grandson soon after birth.—S.N.S. photo.

TWO INJURED WHEN CAR LEFT THE HIGHWAY—A midget auto, driven by L.A.C. William Kennett, 28, Toronto, veered off the road and plunged down a 75-foot embankment while a friend, L.A.C. Gordon Fatum, was reaching over to hand him a cigarette. The accident took place along the Queen Elizabeth Way, west of Oakville, Ont. Kennett suffered a broken neck and internal injuries in the crash. Fatum, who was only slightly injured in the crash, climbed back up the embankment and flagged a passing motorist to get aid for his friend. Above is the wrecked car seen after the accident.

STAND BY SON IN WALDORF MURDER—Mr. and Mrs. Ralph Barrow, parents of Ralph Barrow, Jr., who is held for the murder of Colin C. MacKellar, Montreal textile executive, at the Waldorf Astoria, are shown in New York as they appeared at the Tomba prison. They are divorced but have joined forces to aid their son in the forthcoming fight for his life.—S.N.S. photo.

"THANK YOU" PARTY—Hundreds of neighbors came to the birthday party which was given by Elmer Gibbons, of Stroud, Ont., seen here with his Dutch war bride. The guests were those who contributed \$1,000 in cash, grain, hay and livestock after fire had destroyed Gibbons' barn and season's crop late in August. The party was his way of saying "thanks".—S.N.S. photo.

FREAK ACCIDENT TAKES LIFE OF THREE-YEAR-OLD—Freak accident took the life of Kenneth Hardman, three, seen with his dog, Laddie, who tried frantically to rescue him. Kenneth strangled while playing in his brother's car.—S.N.S. photo.

Climbing and scratching of Laddie at the car, seen beside the Hardman home at Kildride, Ont., attracted the attention of the boy's mother, Mrs. J. F. Hardman, who is dead. She left her ironing and ran to the car to find her son's limp body hanging by the door.—S.N.S. photo.

RITA HAYWORTH, with a shy smile on her face, poses for the press on a Pan American Mexico City-bound plane while her publicity shy prince, Ali Khan (son of Aga Khan, one of the world's richest potentates) slides out in the rear room of the airliner. The two have been linked romantically ever since they met on a vacation in France. Ali arrived from Asia recently. They refused to answer any questions referring to their future plans.—S.N.S. photo.

Canada may supply certain types of aircraft for a defence "pool" to be set up under the proposed North Atlantic security pact, according to an informed source in Ottawa.

New-Look hair styles for men were first shadowed by F. Watson, president of the National Hairdressers' association in London. He believes men's styles will soon be as important as women's.

SPORT

Boston Bruins Heaviest Team In N.H.L.

For the third straight season, Boston Bruins have led the heaviest team in the N.H.L. The average weight of the 17 players on the Boston club this season is 177.5 pounds. Detroit Red Wings and Toronto Maple Leafs are close behind the Bruins in poundage with an average of 176.5 and 176.4 pounds respectively.

Average weight of the 18 players on the New York Rangers last season is an even 174 pounds. Chicago Black Hawks have a 172.2 average while Montreal Canadiens are the lightest team in the League with an average of 170.7 pounds per player.

Top weight for an individual player in the National League this season is 200 pounds and there are only five players in the loop at that figure. They are Woody Dumart and Jack Crawford of Boston, Butch Bouchard of Canadiens, Doug McGeig of Toronto, and Doug McGeig of Chicago. Buddy O'Connor of Boston is still the lightest player in the circuit at 142 pounds.

Last year Boston had an average of 180 pounds while two years ago the average was 179 pounds. A year ago Toronto had an average weight of 176 pounds while in 1946-47 the Leafs averaged 177 pounds per player, who were the second heaviest squad in the League this campaign, were the second lightest team last year when in 1946-47 they were just back of Boston with an average of 178 pounds per player.

Canadians were the lightest crew in the N.H.L. in 1946-47 with an overall average of 170 pounds but last year they were the third heaviest with an average of 175. Chicago Black Hawks, second lightest club this season, were the lightest last season at 164 pounds per man. Rangers had an average of 175 in 1946-47, and 171 in 1947-48.

KITCHEN MEDITATIONS

Twenty Below!

By JANE DALE

"Wrap yourself up warm Johnny. Mind, it is twenty below!" There is a ice on the water trough And diamonds on the snow. Don't stick out your tongue, Johnny. Against the old iron gate. Remember, it's right frosty now. Don't cry when it's too late. You can hear the late train whistle Though it's six miles away. Just like it's coming in the lane; The air is sharp today. Mind, now don't get cold, Johnny. And play out in the sun. Even when it's twenty below A child must have some fun!"

UNEMPLOYMENT IN B.C. REACHING HIGH RECORD

VANCOUVER—William Hogrobin, regional superintendent of the National Employment Service, said unemployment in British Columbia is developing into a chronic situation. He estimated that by the end of the year the number of unemployed in the province would rise from the present 22,000 to 35,000, highest in Canada. Today, there are only 1,500 jobs available, he added.

"Seasonal layoffs, coupled with an average of 400 persons each week in the province, can be blamed for the rise," he said. 2505

RECEIVES \$12,000 VIOLIN FROM HOME TOWN — (S.N.S. photo) popular young Winnipeg violinist, who is visiting Toronto, is shown with the \$12,000 violin presented to her by a Winnipeg civic committee. The first prize that Donna ever received was won with a violin that only cost \$5.

THIS IS A JOB THAT YOU CAN DO

By Edward L. Ross, Medical Director, Sanatorium of Manitoba

If you had read in the papers that a large number of people had lost their lives in a train wreck, or in a fire, or that a mine had caved in, or that a whole shift of miners, you would quite naturally think that this was a shocking disaster. You would be even more concerned if you learned that these catastrophes could have been prevented. This social conscience sensitivity is a fine and normal attribute but you ever ask yourself this question... does it disturb me as much to learn that more than five thousand persons in Canada died of tuberculosis last year, 294 of these in Manitoba.

Yet tuberculosis, as much or more than these other disasters, is preventable. If all the cases of tuberculosis could be found and treated the disease might be eliminated within the lifetime of the rising generation. Tuberculosis presents a challenge which we have so far met only in part. The toll taken by this disease has been reduced as much as 75 per cent. since the turn of the century and it is possible to wipe out the other 25 per cent. as well.

Each year at this time, particularly, the Sanatorium Board offers you an opportunity to come in on the campaign against tuberculosis when you are asked to buy Christmas gifts for the tuberculous. The money raised by the sale of Christmas seals, and always has been, spent within the province for the prevention of tuberculosis, through the discovery of spreaders of infection and the finding of new cases early when treatment provides an excellent chance of recovery.

In Manitoba during the past two years 500,000 people have been x-rayed by mass x-ray surveys and free tuberculosis clinics. The whole Province has been covered and we are well on in the second round. This intensive and greatly increased program to discover new cases and seek out unknown sources of infection among apparently well people is provided by fully equipped and modern mobile x-ray units. It is directed by the Christmas Seal Sale and the fund-raising activities of the Associated Canadian Travellers. Not one cent is spent for sanatorium treatment which is free to the individual requiring it.

Tuberculosis is a communicable disease which can be kept from spreading by treating in sanatorium all those who have it in infectious form. The prime requisite in both prevention and cure is, of course, that the disease be discovered in its early stages. Tuberculosis in this early stage and often even when more advanced does not produce symptoms—so the only sure way of detecting the disease in a person is by x-ray, and in a community by mass x-ray surveys.

Great strides have been made in controlling tuberculosis. In 1900 it was the first cause of death. It is now seventh. This is a considerable victory yet it is not enough as it still remains the leading cause of death between the ages of fifteen and forty-five and is the most wasteful disease in life-years. Surely this is a challenge.

There is so much human suffering that, in unavailability, is something to know that here is one place you can really help. You can be a partner in the campaign against tuberculosis by buying Christmas Seals. This is a job that you can do.

Possibility Of Producing Paper From Wheat Straw Investigated

EDMONTON—Possibility of utilizing Alberta's large stocks of surplus wheat straw for paper manufacturing, is being investigated by the executive of the United Farmers of Alberta.

Reports received from the National Farm Chemurgic Council in the United States hint that manufacture of paper from straw may prove one of the major achievements of the field of chemurgy.

The species of fish called Dipnoi has lungs as well as gills.

PRISCILLA'S POP—What Every Father Knows

Rust-Resistant Wheats Add 40,000,000 Bushels To Harvest

(From Article by Duncan Dunbar in Toronto Saturday Night)

Without sowing an extra acre, have Canadians in the battle against this disease that attacks cereal crops. North America, from the Red River to the Rockies, from Texas to the Peace River, has more than a 100,000,000 acres in crops of one kind or another. Nowhere else in the world does the rust have such an unrivaled opportunity to spread. There are no forests, no mountains, no great waters to bar the way.

Although rust is known in every province in Canada, the really bad area is located in Manitoba, and eastern Saskatchewan. The boundary of this area runs roughly north and east from Assiniboia, Saskatchewan, to Moose Jaw, Sask., then over to Humboldt, Sask., on to Melfort, Sask., south and east to a point on the Manitoba-Ontario border, about 75 miles northeast of Winnipeg.

In the 35 years, 1904-38 inclusive, 17 have been bad rust years, but 1936 was the worst. The loss in that year was over \$200,000,000. In 1932, another bad year, the loss in the Red River valley alone was \$50,000,000.

From 1925-35 inclusive, the average annual loss of wheat in Manitoba and Saskatchewan was 55,418,000 bushels, or 10.8 per cent. of the crop. But the loss is not confined to rust, blight, and other diseases. The quality of the wheat suffers too. Kernels from the heads of rust-infected wheat are small, shriveled, and weigh less than those from rust-free crops. Rust-infected,芒rked wheat of one bushel that averages nearly eight pounds lighter than that from rust-free crops.

Mr. McMillan said that at least one man, who was a wheat grower, had made deliveries of gift merchandise to local offices and had collected payment from a clerk who had been assured that the manager had ordered the gifts. Later the clerk had found that no order had been given.

The man disappears by the time the parcel reaches the manager, after having collected up to \$10 in payment. Mr. McMillan declared, in explaining the procedure. The articles are not worth anything like the amount collected. So far we have learned of studied animals and lamps in the delivered parcels.

The bureau manager said that the police had been advised of the trick and were watching for further incidents. The co-operation of the public was requested by Mr. McMillan.

IMMIGRATION INCREASES
OTTAWA—Flow of immigrants to Canada in the six-month period ended Sept. 30 was 112 per cent. greater than in the corresponding period of 1947, the resources department announced.

BURMA: LAND OF THE FROZEN FIRE

Asiatic Town Heart Of Ruby, Sapphire Mining Area

MINING FOR RUBIES. Left: Water washes gravel from pit mine's side into pool at the bottom. Center: The resultant ooze is now pumped up into a basin. Right: From there the gravel is sifted very carefully for possible gems as it is washed down a

By WALTER MCGEE
Central Press Canadian

MOOGOK, Burma.—Have you ever wondered when fingering a ruby ring or admiring a sapphire brooch just where these gorgeous gems originate?

Nestling in a small valley surrounded by mountains is Mogok—a town of frame houses on stilts along narrow cobblestone streets which slope toward two small blue lakes. About 400 feet above sea level, Mogok is roughly half way between the Irrawaddy river—of Kipling fame—and the famous Lesho road to China. Mogok is the home of rubies, which the *Encyclopaedia Britannica* calls "the most valued of all gemstones," and sapphires, which are only slightly less valuable.

Gem mining is Mogok's sole justification. It is the townpeople's chief preoccupation. "Ruby Town Health Home," says the sign—as if to emphasize this preoccupation—on the office of the bearded Sikh, who is Mogok's local physician.

My guide here is a retired British army officer, Maj. C. M. Enriquez, 61, a student of Mogok folklore and gems. He has written widely on Burma, including books with such titles as *A Burmese Arcady* and *Beautiful Burma*.

The nearby mountains are part of the earth's original crust, Enriquez said, and are among the oldest in the world.

"The gems and other minerals—such as garnet, graphite and mica—were wrought by tremendous pressures of the earth's primeval conflagration," the major explained to me. Then added: "The ruby deposits have just been accreted."

Mogok's history is shrouded. A Burmese royal edict in 1597 refers to the mines. The major believes that they probably were first discovered by immigrant Chinese.

Several of antiquity's famous gems may have come from Mogok, Enriquez said. "To our knowledge a stone like the great spinel in the Mallow cross of the British imperial crown, which was given by Pedro the Cruel to Edward, the Black Prince, could have come from nowhere else."

Rubies are also mined in Shan, Ceylon, India and Afghanistan. Few are found at Yogo Gulu, near

Uttica, Mont., and Covese Creek, Canada, county, N.C. However, these rubies are smaller than Mogok's and the rubies are said to be inferior.

Nobody knows the size of the heaviest ruby ever discovered. The mines formerly were a monopoly of the Burmese kings, who claimed all stones over a certain weight. To avoid their seizure by royal inspectors, miners cut up large ones.

Mindon, next to last of Burma's kings, possessed a ruby the size of a small hen's egg, which he hung from the ear of his favorite elephant.

The heaviest known modern ruby ruler was the Pacer Ruby, discovered Nov. 11, 1918. It weighed 43 carats in its raw state, 24 carats cut—about the size of the marbles kids flip into the ring. It sold uncut for \$300,000, roughly \$400,000.

Raw sapphires come much larger, sometimes the size of the human head. The best portions are cut away.

Rumors persist that at least one ruby that the Pacer Ruby has been discovered since, but that owners are awaiting higher bids or seeking to evade taxes.

Dealing in stones is conducted furthest from the mines, on a tiny plate on a tiny table. Squatting beside it, the buyer states his price in local money—literally.

By pressing various finger joints, price. This is so that a competitive bidder may not know another's offer. The seller talks back in turn. This continues until a bargain is struck.

Stones valued up to 10,000 rupees are cut in Mogok. More expensive ones are sent to Amsterdam, London and New York.

Many of the buyers are Indians and Chinese. Sometimes buyers come from further afield. The major told of an American who arrived several years ago.

"One night he brought a big farewell party at the club, at which we noticed a Chinese and a Chinese with a small leather bag. Accompanied by a heavy guard, he drove late at night. The guard's whisked him on the train to Rangoon. When he arrived, he was a millionaire."

Recalls When Indians Bound Their Skulls

VANCOUVER.—The days when British Columbia's Indians bound their skulls to produce cone-shaped heads were recalled here recently by Rev. G. H. Haley.

Dr. Haley spent more than 30 years with the west coast natives, and now owns the "talking stick" carried by Chief Shakes when he went to Queen Victoria's Diamond Jubilee celebration.

He remembered seeing an Indian woman whose head had been bound with cedar strips when a child so that it measured 18 inches from chin to crown.

PRECEPTS

Precepts are the rules by which we ought to square our lives.

—Seneca.

The practices of good men are more subject to error than their speculations. I will then honor good examples, but endeavor to live according to good precepts. —Blaise Pascal.

I can easier teach twenty what were good to be done, than to one man the practice of the twenty. —Shakespeare.

Jesus' teaching and practice of truth involved such a sacrifice as makes us admit its Principle to be Love—Mary Baker Eddy.

God blesses still the generous thought, And still the fitting word He speaks, And Truth, at His requiring taught, He quickens into deeds. —Whittier.

The best of all the preachers are men who live their creeds.—Bishop A. Guet.

sized there he insured the bag—for 600,000 rupees.

Rubies and sapphires originate in the hard rocks and limestone. They are sought, however, in gravel, carried into the valleys during millions of years of erosion.

A mine I visited was a pit about as wide as a city street and as deep as a two-story house. Rising through bamboo pipes, water from hill streams far down was played on the pit's walls. Mud and ooze fell into a pool at the pit's bottom.

The mud was pumped up a steel pipe into a wooden trough where workmen dived to sort it for the gleaming stones. From time to time we saw a workman pop a stone into the cup of bamboo state.

Women re-examined the mud for small gems which are sold for watch jewels or embroidery or "costume" rubies.

The mines are worked mainly by Shans, the natives of the region, who work towards around their heads like women at the hairdresser's.

Nearly, other methods are employing other methods. In one method, the miner, who merely diverted a stream into a shallow trench.

On the other side, which was digging a 10, or tunnel, into hillsides, following natural crevices, which occasionally open into vast caverns.

The next time you drop into Tifany's or your hometown jeweller, think of this lazy valley town in up-river Burma when you examine the rubies and sapphires, for the stones quite probably came from here.

TWO-YEAR TRIP AIDS TEACHER OF GEOGRAPHY

VANCOUVER.—Geography lessons are bound to be particularly thrilling for one class of Sapperton, B.C., students this year.

For a teacher that has 21-year-old Lucy Vink, whose first-hand knowledge of the remote places of the earth rivals that of many of an old salt.

Miss Vink arrived home this summer after a two-year sea odyssey aboard Rev. John Antler's Revue.

This summer she spent months with the Grenfell off the coast navigating the intricate "inside" coastal waters.

She finds she must take to a land-lubber's occupation in order to make a living.

"I think some day she'll be off to sea again," muses Lucy's mother. "It will be difficult to keep her on a land dry forever."

BOOTLEG MARKET IN DEER CARCASSES

WINNEPEG.—Provincial game wardens and R.C.M.P. were reported to be seizing up members of a large operating large-scale bootleg market in deer carcasses. G. W. Malabar, director of the Provincial Game and Fisheries Department, said numerous carcasses had been made in the area north of here.

Canada Leads World With Speedy New Jet Airliner

Canadian designed and built, the jet airliner being built at Malton, Ont., and expected to fly early next spring, puts Canada first in the field with the world's fastest commercial transport. It is a 300-foot long, four-engine, carry up to 40 passengers, and cruise at a speed of 400 m.p.h. to 30,000 feet.—B.N.A. photo.

HEALTH Obesity— A Disease

Obesity—the state of being overweight—is a disease and a dangerous one, it is stated in the current issue of *Health*, magazine published by the Health League of Canada.

In an article "Obesity and Health," Dr. W. Cheney of Toronto says that obesity is one of the great problems of middle age—it is a disease, a prevent to main types, namely the acquired or simple type and the endocrine type which is due to glandular dysfunction. The acquired type is due to excessive intake of food or alcohol in relation to the amount of exercise.

Dr. Cheney says that because of increased weight, muscular activity places a greater load upon the heart and the blood vessels. The result is that the heart works harder, and the blood pressure goes up to keep up the supply with the demand.

Diabetes is more common in the obese than in persons of normal weight. The incidence of gallstones is relatively high in the obese persons, while individuals who are overweight are more resistant to infections and are poor surgical risks than those of normal weight.

Obesity must be differentiated by careful history, physical examination and laboratory tests before treatment can be administered to the patient. He reveals that women are more predisposed to obesity than men in the ratio of 10 to 1, owing to pregnancy, lack of exercise, menopause and food habits.

In discussing simple obesity, Dr. Cheney states that this type is usually the result of the consumption of a high caloric diet in excess of energy requirements. He warns, however, that overweight persons should not be subjected to diet food, because the body must have certain essential foods in order to remain healthy.

"The regimens of many diet kitchens and other physician's diets are frequently dominated by tradition and empirical notions," Dr. Cheney says. "Many such diets are quite complex, unsatisfactory, and often, if continued over a long time, are positively dangerous because of nutritional imbalance that induces deficiencies."

"In diet planning, one should adhere as far as possible, to the normal, well-balanced diet except in certain diseases of metabolism in which balance of specific dietary essentials must be radically altered from the normal. Except in special therapeutic treatment, it is important to include in the diet protective foods that will provide all the vitamins, minerals and sufficient good quality protein."

"In certain restricted diets and in the treatment of conditions of malnutrition, the feeding of pure vitamins or minerals may be indicated to insure an abundant supply and to obtain quick improvement, but in general it is preferable to obtain a high intake of dietary essentials through the use of natural foods which are more likely to furnish other needed nutrients as well and be more pleasant to take."

Dr. Cheney emphasizes that each obese person must be treated individually and his diet must be adjusted accordingly.

Helpful Hints

Instead of putting another blanket on your bed put a sheet over them already on, it acts as insulation and doesn't add weight.

First Aid to a white mark or ring on your table top is linned oil or half-and-half linned oil and turpentine. Moisten a cloth with the linned oil, warm it and rub it thoroughly. Hot linned oil is good for filling in scratches too.

If you aren't sure fried chicken is done, cut through the thigh bone to the bone; if the meat cuts easily and there isn't any trace of red at the bone the chicken's well cooked.

Princess Margaret Rose Gets Laughs From Courtship Rumors

(By NORMAN CHIBBEN, Canadian Press)

LONDON.—Since Margaret celebrated her 17th birthday more than a year ago, gossip has been busy with the names of no less than nine men as likely husbands. They are formed by King Michael of Romania, Prince George of Denmark, the Marquess of Milford Haven, the Marquess of Blandford, the Earl of Derby, the Earl of Dalhousie, Lord Forchester, Lord John Hope, son of the Marquess of Linlithgow, and Lord Ogilvy.

Lately the list has been thinned down. Michael and the Earl of Dalhousie have married, while Prince George of Denmark has publicly denied he is courting Margaret.

When the Marquess of Blandford was invited to Balmoral last summer, it was rumored he was being put through his paces as a possible royal husband. But since his return from Balmoral, he has been escorting Sharmar Douglas, daughter of the United States Ambassador to Britain.

The Marquess now is described as one of Princess Margaret's best friends—nothing more. The young Lord Forchester and John Hope also have been relegated to this category.

Most favored at present is the gay, good-looking Marquess of Milford Haven, who was the Duke of Edinburgh's best man at the Duke's wedding.

A former naval officer, he recently was named to the United States as a radio-telegrapher.

Royal circles believe Margaret has no intention of getting married. But inevitably, every time she goes out with a young man, a new rumor is started. "Friends" are the cause of most of these rumors but it is irritated when gossip writers "go too far."

Newest Gadgets Very Definite Help To Blind

NEW YORK.—A blind man can now thread a needle.

With latest gadget, he can also play cards, checkers, go fishing, cook, cut a roast, even read a slide rule or microscope. These measures to two thousandths of an inch.

These devices by which the blind can expand their vocational and recreational horizons are on display at New York headquarters of American Foundation for the Blind, which acts as a clearing house for information on blindness.

Much of the equipment has been developed by the foundation's people themselves and now is commercially produced.

One of the foundation's supervisor of technical research, displayed a plastic and metal needle threader.

It is a small, simple device, says a metal hook, operated by a metal strip protruding from the needle. The threader, can be passed through the needle eye into a slot which receives the thread.

How does the simple device separate an egg? Simple. She uses a tunnel which retains the yolk and allows the white to slip through.

Many Names Suggested For Royal Baby

LONDON.—Why not call him Jake?

The Evening News, one of the newspapers circulating on the most popular name for the Prince when he is born, is the name of Philip, said that entry had come from Chicago.

"You can't imagine King Jake the first? Frankly, no one can," said the Evening News columnist.

What name the baby will be given is Britain's favorite guessing game. Birmingham Palace sources say it is foolish even to guess.

But people everywhere are willing to help with suggestions.

The newspaper polls say the favorite names are Philip, for the father; George for the King; and Edward for the Duke of Windsor.

One English household suggested "Philip Edward Andrew Christopher Robert." The first letters of these names spell P-E-A-C-E, which is what every mother would like.

Other suggestions have been Winston Churchill and Franklin Delano.

MONTANA CATTLE CHEW UP DYNAMITE

HILLING, Mont.—Montana livestock has been munching dynamite and fence posts.

Deputy Harold Price brought 78 sticks of dynamite to the sheriff's office here, saying it apparently had been scattered along a highway after it fell from a truck.

Price said a farmer reported his cows ate several sticks and a mother said children brought 14 sticks into her yard.

Another farmer reported neighboring herds had eaten a fence consisting of cedar posts.

Smile of the Week—

NOT NOW

The customer was ordering a new suit. His wife, however, told him it would not be ready for six months.

"Six months?" cried the customer. "Why the hell would it take six months?"

"Try," said the tailor. "But have you taken a look at it lately?"

Canada's Foreign Trade

WHILE MANY CANADIANS have questioned whether the era of prosperity which followed the war will end as an enduring one, there is as yet little cause to believe that it will end soon. Prices, incomes and rates of employment all remain at high levels and there are few indications that there is a falling off of any of these at the present time. The demand for food has increased in this period because of higher incomes and rising standards of nutrition in this country. Abroad, extensive war damage and growth in population have raised the need for increased imports of food from this country. While foodstuffs form an important part of our trade both at home and abroad, demand has increased for many other Canadian products as well and this contributes in a large measure to the prosperity which we now enjoy.

Now Reaching High Levels

Recent figures issued by the Canadian Bureau of Statistics show that Canada's export trade is not only reaching very high levels, but that it is setting unprecedented records. In the month of September, this year, Canada's total exports were valued at \$283,000,000. This was compared to the figure for August, which was \$244,100,000. Shipments to the United States for September totalled \$162,000,000, showing an increase of \$74,000,000 over one figure for September, 1947. This large increase was attributed to the lifting of the export ban on fresh beef and beef cattle to the United States and also to greater demand there for Canadian woodpulp, newsprint and other wood products, as well as base metals and non-metallic minerals.

More Sent To Europe

Decreases were registered in the amount of goods exported to the United Kingdom, and the Latin-American countries, but more was shipped to the principle markets of Europe than in the previous year. In the first nine months of the present year Canada's total exports to all countries with which she trades amounted to \$2,108,200,000. This was compared with the figure for the same period in 1947, which was \$2,094,000,000, showing an increase of over \$100,000,000. While export trade alone is not the criterion of a nation's prosperity, increases such as have been shown in the past year do not indicate any falling off of production or in revenue from our foreign markets. A sharp decline in export trade, without doubt, he takes as an alarming sign by Canadian producers and would inevitably have an adverse effect on our national economy. While the present period of prosperity has brought higher prices for many of our exports, such as commodities, it has also brought high rates of employment, higher wages and better prices for the products of our farms and other primary industries. A flourishing export trade no doubt contributes to this prosperity, and figures show that there is at present no indication of a recession in this branch of Canada's economy.

N.Y. Syndicate May Invest Millions In Alberta Oil Sands

EDMONTON.—Gene Tunney said in an interview here that syndicate of New York oil interests may spend \$50,000,000 in a scheme to reclaim oil from sands along the Athabasca River about 250 miles northwest of Edmonton.

Mr. Tunney, former world heavyweight boxing champion, left by plane for New York.

He said a syndicate which he represents has made a proposal to the Alberta Government to undertake such a project at an ultimate expenditure of \$50,000,000.

BACHELORS WARNED NEVER TO SEND WHITE ROSES

TORONTO.—An man shouldn't give a girl white roses unless his maternal intentions are serious, says Helen Hutcheon Weber.

"White roses mean a proposal and are an invitation to trip down the aisle," says the rose stylist, who came recently from New York to arrange roses for the winter fair.

Red roses are safer, she feels. They signify love, all right—but there's nothing binding about them.

FUNNY And OTHERWISE

Two women were chatting over tea.

"Yes," said one, reminiscence, "I was married in love with my dear husband at first sight. I remember it just as though it were yesterday, was walking along the front at Brighton with my father, and he suddenly pointed to him and said, 'There, my dear, goes a wealthy man.'"

Foreman: "You are asking big pay for a man with no experience."

Applicant: "Well, the work is much harder than you don't know anything about it."

"Are you sure your wife knows me?"

"I'm going home to dinner with you."

"Knows? I should say so! Why, George, I argued with her about it this morning for half an hour."

The bridegroom was missing just after the ceremony at a Scottish wedding.

"Where's Angus, the groom?" asked the minister.

"He's back of the car, tryin' to get the old sheep" answered the best man.

Teacher: "So you have been fighting again, William. How many times have I told you that when you have been struck on the one cheek you must turn the other cheek to the striker?"

William: "I know, sir. But please, this time Jack hit me on the nose, and I haven't got another."

"My wife thinks she should have a washing machine."

Yvette: "Jack, Mike thinks she married one."

"Jim," she said, as he settled down for his afternoon smoke. "You got a lot of things I want to talk about to you."

"Good," said her husband. "I'm glad to hear it. Usually you want to talk to me about a lot of things you haven't got."

Auto Examiner: "Do you know what it means if a driver puts out a hand?"

Applicant: "Well, if it's a woman, it means she is going to turn right or left, shake the ash off her cigarette or reverse or stop or she's pointing to a hat store, or admiring her ring."

Examiner: "Yeah, and if it's a man?"

Applicant: "Why, he's usually waving at a woman."

An actress was taking her dog for a walk in the park.

"Get out of here, Sir," said the dog, wearing a new fur coat. The dog began to lead in friendly fashion around the wearer of the fur coat.

"Don't mind Fido," she said sweetly, "he's so keen on rabbling."

WORLD'S HIGHEST VOLCANO

Mauna-Loa, Hawaii, is the largest volcano in the world, although not the loftiest. Kilauea is a crater on its eastern slope.

WHEAT TROPHY GOES TO RED DEER, ALTA. — R. C. Vaughan, C.M.G., chairman and president, Canadian National Railway (right), presented a new world's championship wheat trophy to J. A. Norther (left), president of Canada's big agricultural show, the Royal Winter Fair, held at Toronto. The trophy was won by year's wheat king at the Chicago Exposition.—S.N.S. photo.

Western Briefs

FREAK CARIBOU

THE PAS, Man.—Trader Donald Bradburn, of Oxford House, 250 miles east of here, reports a caribou with two heads and eight legs has been observed romping among its fellows near Oxford Lake.

LARGER AND BETTER EGGS

Warm water in the henhouse during the winter means more larger and better grade eggs.

EDMONTON.—A million dollar freight-shed replacement program is planned here by Canadian National Railway to catch up with the area's decade of growth as a distribution centre. Construction will begin in the spring. C.N.R.'s western region general manager H. H. Sparling announced. He said the building operation is to extend over several years.

NELSON, C.B.—Maybe the snow's out of season, or perhaps it's just contrary Kootenay weather. At any rate, it's a bit of a puzzle to see in a Nelson garden, white with two inches of snow, plum and lilac trees in blossom, and to see a plum tree shooting new wood and leaf. The spring-inclined trees are the property of Alderman and Mrs. T. S. Shorthouse.

CANORA, Sask.—A veterinary area covering the municipalities of Cananda, Goddard, Invermay, Sarnam and Preceville was formed at a meeting held at Rama.

THE PAS, Man.—The northern Manitoba trappers' festival committee of The Pas chamber of commerce announced that a total of \$1,500 in cash prizes will be offered to Manitoba trappers at the Canadian championship dog team race here Jan. 20, 1948.

EDMONTON.—The Edmonton Journal, in a newspaper story, said the possibility of a steel mill for Edmonton is indicated because the English Steel corporation of London has decided on immediate establishment of an oil drilling equipment manufacturing plant.

SELECTED RECIPES

TAPIoca CREAM

2 slightly beaten egg yolks
4 cups scalded milk
1 cup quick cooking tapioca
1 cup sugar
1 teaspoon salt
2 stiffly beaten egg whites
1 teaspoon vanilla

Mix the egg yolks with a small amount of milk. Add the tapioca, sugar, salt, and the remaining milk which has been scalded. Cook in double boiler for 10 to 12 minutes after water boils, stirring frequently. Or bring quickly to a boil over direct heat, stirring constantly. Remove from the heat; mixture will thicken.

Fold hot mixture into egg whites. Cool slightly. Add vanilla, chill thoroughly. Serves 6 to 7.

To make milk this recipe, use 2 tablespoons of tapioca and half of all the other ingredients.

SNOW BALLS

2 cups flour, sifted
2 teaspoons baking powder
1 cup sugar
1 cup butter
4 egg whites, beaten stiffly

Sift the flour, salt and baking powder. Cream the butter, stir in the sugar. Add the egg whites, mix ingredients alternately with milk. Beat until mixture is thick, puffy. Buttered custard cups 8 1/2; fasten wadded paper over the top and tie securely.

Steam 50 minutes. Unmold and serve with sliced peaches, crushed strawberries or raspberry sauce. Serves 6 to 8.

Abbotsford, which was the home of the Red Deer, is located on the 2805 River, Scotland.

World Wheat Championship Winner Learned Of Success By Conversation

TORONTO.—Sydney Allsop, 34-year-old farmer from Red Deer, Alta., learned in a chance conversation with friends at dinner that his entry of 15 pounds of Howard wheat entered in the Royal Winter Fair carried off the world championship.

The quiet, ruddy-faced farmer has been showing wheat since he was 16, when he won the Royal wheat championship with an entry of turkey red variety in 1930.

Since then he has won two world wheat crowns at Chicago's International Exposition. Concentrating in Howard wheat, he topped the list in 1934 and last year.

Farmers Advised To Change From Red Bobs Wheat

CALGARY, Alta.—Red Bobs wheat for many years the old faithful standby of southern Alberta farmers, and a particular favorite in the Calgary district, received its hardest blow recently. The Board of Commissioners notified farmers and farm organizations officials that they had voted to change their growing operations and discard Red Bob.

The Board came to the decision some time ago but action was delayed during the war years, due to the scarcity of food.

It was stated that complaints had been received from millers over a period of years concerning the quality of this particular type of wheat. It had always been rated as No. 1 Northern, but never quite came up to the quality expected.

Farmers were advised to change their sowing operations to Saunders, Thatcher or even Redman if they wished to hold their ground.

Confronted with reporters who had

sought him for almost 24 hours after the announcement of his winning he related what went into the growing of the world-beating wheat. He didn't say where he had been for 14 hours.

Planted on May 15, the wheat was carefully harvested with a binder about 80 days later. The yield, which he estimated 72 pounds to the bushel, was then hand-placed for the best grain.

Jack has lived with his parents, Mr. and Mrs. Sidney Allsop, and his younger brother, Albert, on three Alberta farms—at Wembley, in the Peace River district, and now at Red Deer.

He is proud of his farm. He thinks that Red Deer, gently rolling country, 170 some 80 miles north of Calgary, is "hard to beat" for farming.

Unmarried, Jack farms the 460 acres with his parents. It's a mixed farm. With his wheat and other field crops he raises six head of Holstein milk cattle, and 30 Angus steers. The livestock is for use, not for show purposes. He would rather stick to winning wheat titles.

It is estimated that Shakespeares wrote two plays a year.

How to Make Beautiful Christmas Gifts your friends will treasure!

Now is the time to make those Christmas gifts which are so much appreciated by your family and friends not only for their usefulness but also for the exquisite handiwork that makes them unique. Lewiscraft kits, listed below, enable you to enjoy the satisfaction and pleasure of successful craftsmanship in any field you choose. Each kit is designed to give complete instructions, tools and materials to produce a perfect example of each craft.

With Lewiscraft Simplified Kits anyone can make priceless gifts

<p>Simple Jewellery-Craft</p> <p>Kit No. 1—Square Jewellery, postpaid \$1.00</p>	<p>Shellcraft—Decorative Shellwork</p> <p>Kit No. 2—Felted doll-dwelling kit, postpaid \$2.00</p>	<p>Crayon Jewellery—12 new</p> <p>Kit No. 3—Crayon Jewellery, postpaid \$2.00</p>
<p>Handcrafted Textiles—Cotton</p> <p>Kit No. 4—Textile Painting, postpaid \$3.35</p>	<p>Shellcraft—Decorative Shellwork</p> <p>Kit No. 5—Shellcraft Beginners, postpaid \$1.00</p>	<p>Shellcraft—Advanced Kit</p> <p>Kit No. 6—Shellcraft Advanced, postpaid \$4.00</p>
<p>Adorned—Flora's a quick</p> <p>Kit No. 7—Link Ball, postpaid \$1.25</p>	<p>Christmas Card Craft—12 new</p> <p>Kit No. 8—Line Book Printing, postpaid \$2.50</p>	<p>Glass Baking Cup—12 new</p> <p>Kit No. 9—Glass Baking, postpaid \$2.00</p>
<p>Castile Oil—A new idea</p> <p>Kit No. 10—Castile, postpaid \$4.00</p>	<p>Greenwood—For that special</p> <p>Kit No. 11—Greenwood, postpaid \$2.00</p>	<p>Lewiscraft—12 new</p> <p>Kit No. 12—Lewiscraft, postpaid \$6.00</p>

SPECIAL SHELLCRAFT DOUBLE-HEADER KIT

Special value in Shellcraft presents. Two complete kits for only \$12.00 (the 12 kits of all Lewiscraft kits, postpaid \$24.00). Includes complete instructions, tools and materials for making 12 different gifts. Includes 12 different gifts. Includes 12 different gifts.

Kit No. 12-13—Shellcraft, double-header 3 kits offer, postpaid, \$12.00

You'll be amazed and thrilled at the simplicity of these handiwork and the fun you'll have in making really original presents in your spare time. You need no special skills. If you can cut a piece of fabric, hold a needle, write a brush, the secret of handcraft is right within your grasp. Just select the craft that interests you most. You'll find a Lewiscraft kit that will enable you to turn out a finished article you'll be proud to give. Or if you have craft-minded friends, why not select one of these splendid kits as a gift. Your thoughtfulness may start a trend on a lifetime hobby.

Don't delay... all craft supplies are limited. Send your order now and be ready in time to enjoy the Christmas Season.

CANADA'S FOREMOST CRAFT SUPPLY HOUSE

Lewis Craft Supplies Limited

425 GRAHAM AVENUE, WINNIPEG, MAN.

We carry a large and most complete stock of materials and supplies for all arts and crafts. Write for complete lists and pamphlets.

CARD OF THANKS

We would like to thank our relatives, neighbors and friends for their many acts of kindness and sympathy and the many floral tributes sent during our recent and bereavement in the sudden passing of a dearly beloved wife and mother.

Chris Martin and Family

TENDERS INVITED

For the purchase of Sarscoe Butte School and Teacherage. Tenders for both buildings or separately as desired. Buildings to be removed from school grounds. Tenders will be accepted up to December 9, 1948. Highest or any tender not necessarily accepted.
